Bu sayfa geldiginde artik projemizi olusturmus oluyoruz.

Jira Software interface showing the 'Active sprints' section for the 'B171Projesi' project. The sidebar on the left lists various project management tools under 'PLANNING' and 'DEVELOPMENT'. The main area displays a Kanban board with columns for 'TO DO', 'IN PROGRESS', and 'DONE'. A message indicates that there are no active sprints and suggests starting sprints in the Backlog. A notification at the bottom left confirms that the project was successfully moved to the trash, with options to 'Go to trash' or 'Restore'. The top right corner features the 'QA 09 Team' logo and a search bar.

Bu asamadan sonra artik projemize ekip arkadaslarimizi eklememiz gerekir

Projeye ekip arkadasi ekleme

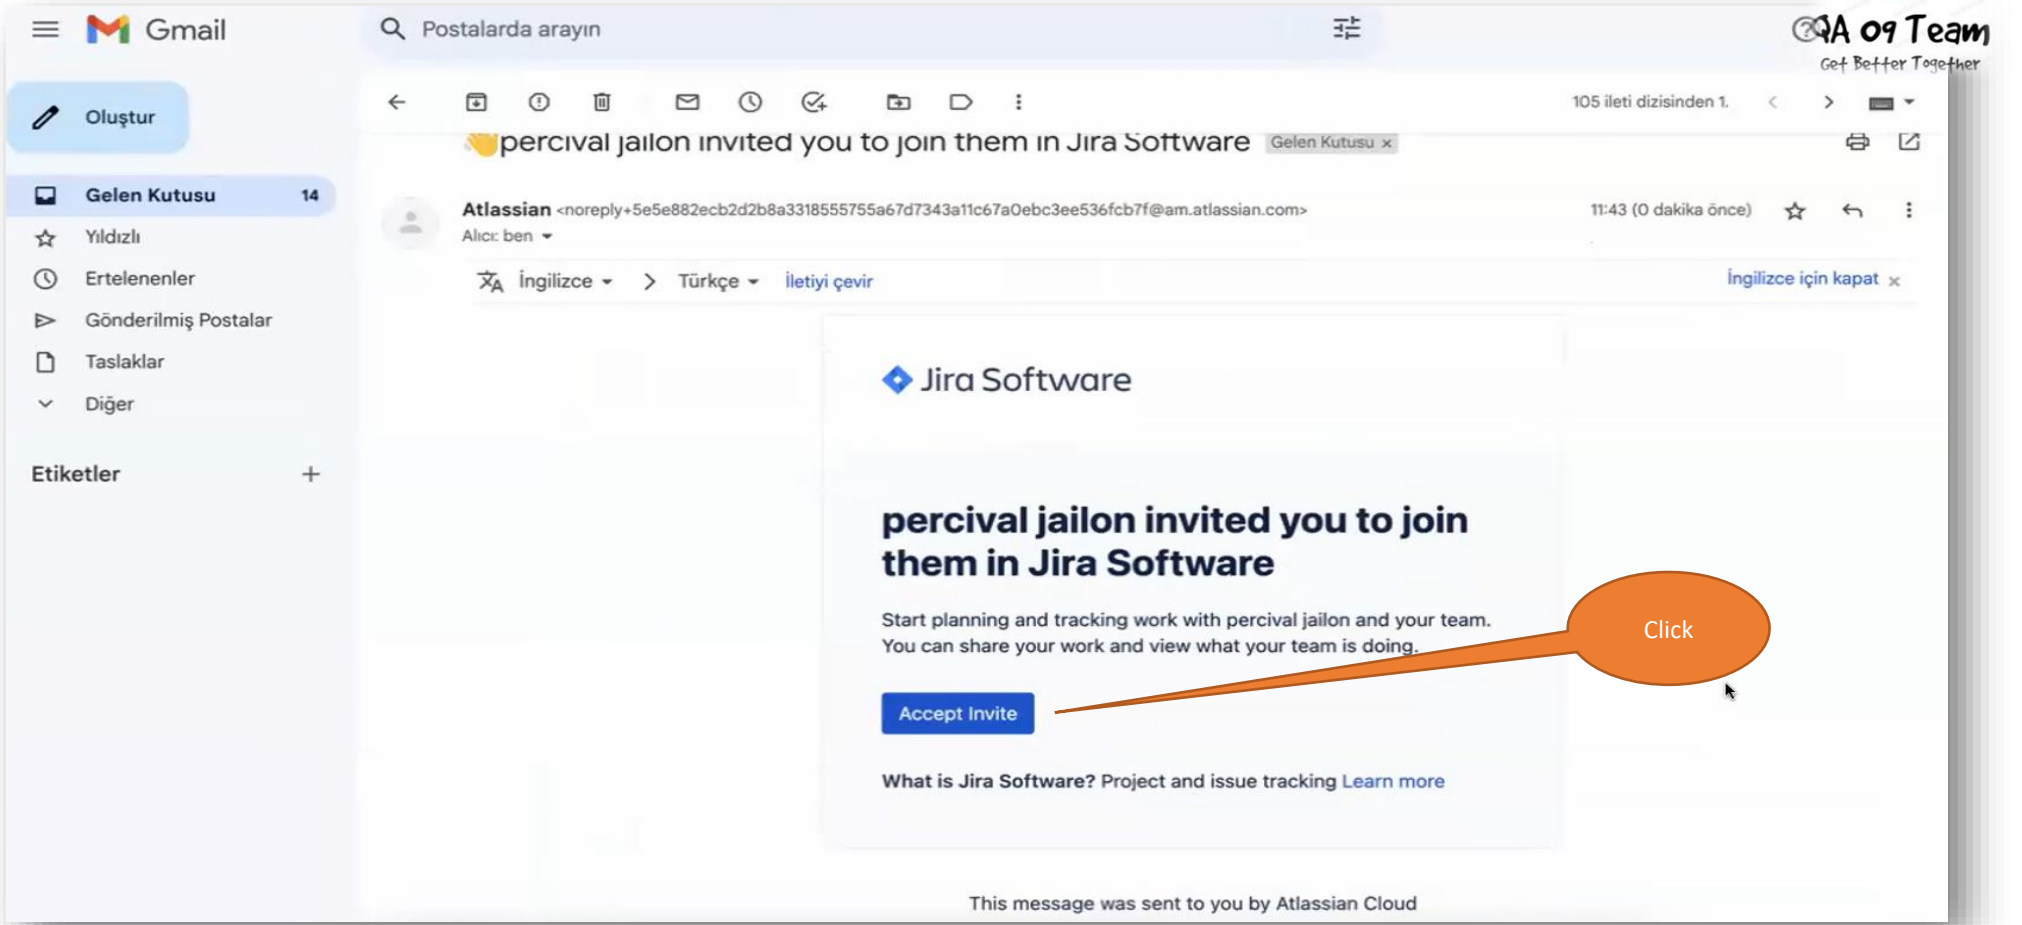

The screenshot shows the Jira Software interface for a project named 'B171Projesi'. The 'Teams' dropdown menu is open, showing options: '+ Invite people to Jira', 'Create a team', and 'Search people and teams'. An orange arrow points to the 'Teams' dropdown, and another orange arrow points to the '+ Invite people to Jira' option. A speech bubble with the word 'Click' is also present. The interface includes a sidebar with 'PLANNING' section, 'BP board' selected, and 'Active sprints' view. The main area shows 'Active sprints' with 'TO DO' and 'IN PROGRESS' columns.

Ekranda cikan kutudan Ekip arkadaslarimizi ekleyebiliriz

Eklenen maillerin jira'da kayitli olmasi onemlidir

The dialog box titled 'Add people to Jira Software' shows a list of email addresses: busrakirsac@gmail.com, arda.ulgu.35@gmail.com, minanuroguz@gmail.com, and omerskacars@gmail.com. Below the list are buttons for 'Google', 'Slack', and 'Microsoft'. The 'Access' section has a checkbox for 'Site users to invite other people.' which is checked. At the bottom, there are 'Cancel' and 'Add 4 people' buttons.

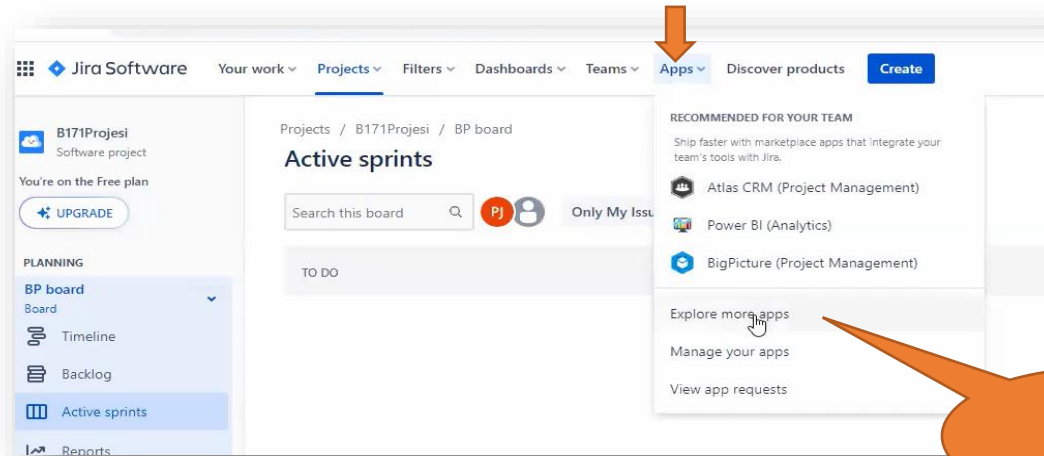

Projeye davet edilen kisi mailini acar ve "exept invite" diyerek projeye dahil olur.

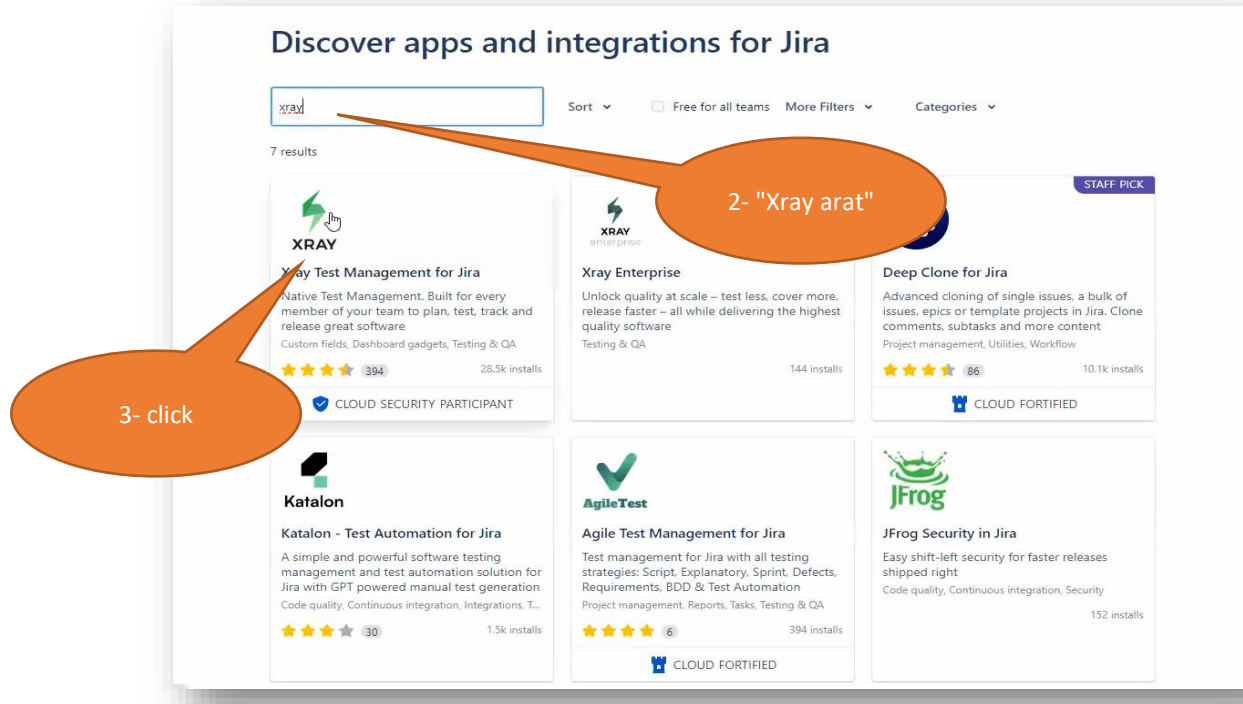

Accept Invite

Get Started with Xray

- Project configuration and organization
- Creating Tests as Jira issues
- Organizing Tests
- Define a testing strategy using Test Plans
- Executing Tests
- Requirement Test coverage
- Reports: tracking, measuring and analyzing
- Useful resources

Project configuration and organization

Xray uses Jira issue types to define testing entities, such as: Test Cases, Test Sets, Preconditions, Test Plans and Test Executions.

Xray automatically creates these issue types when installed; however, project administrators must still manually add these issue types to each project. This allows you to keep projects separated from

Summary

This page contains a brief summary of the Xray configuration for this project.

Issue Types

Xray Issue Types in Project

There are 0 Xray issue types configured for this project. In order to enable this project for testing with Xray, you need to configure the Xray issue types. You can do it automatically by pressing "Add Xray Issue Types" or manually by going into the issue type scheme for this project and adding the Xray issue types there.

[Add Xray Issue Types](#) - [Configure the Issue Type Scheme manually](#)

Name	Description	Present in Project
Test	This is the Xray Test Issue Type. Used to define test cases of different types that can be executed multiple times using Test Execution issues.	
Precondition	This is the Xray Precondition Issue Type. Used to abstract common actions that must be ensured before the test case execution. A Precondition can be associated with multiple test cases.	
Test Set	This is the Xray Test Set Issue Type. Creates a group of test cases. Used to associate all included Tests with other Xray issue types like Test Execution and Test Plan. A Test Set can also be associated with a requirement issue to provide coverage and test status.	
Test Plan	This is the Xray Test Plan Issue Type. Used to define the scope of test cases for a given test campaign and to aggregate all executions for those tests displaying the latest result for each test case.	
Test Execution	This is the Xray Test Execution Issue Type. Used to execute test cases already defined.	
Sub Test Execution	This is the Xray Sub Test Execution Issue Type. Used to execute test cases already defined. A Sub Test Execution can be created for a parent issue like a requirement in order to execute the test cases associated with it.	

Miscellaneous

This project is currently using the global miscellaneous settings. [Configure](#)

Test Coverage

This project has no issue types mapped as covered. [Configure](#)
